

Redefining the **Essentials**
of **Better Hearing**

GREAT PERFORMANCE

Technology supporting the brain

When you are looking for a hearing solution, there is more to think about than simply making sounds louder.

The more detailed the information your brain receives, the easier it is to identify and understand what you hear.

Excellent sound quality for easier hearing

Oticon Ria2 hearing devices offer excellent sound quality and preserve sounds in a more natural form to make hearing both easy and more realistic. A pair of Ria2 Pro instruments will even synchronize their performance to offer a more balanced sound picture.

You can also enjoy the benefits of features such as Free Focus, to help you focus on the sounds you need to.

Improved speech understanding

The key to Ria2's excellent sound quality is the tiny but extremely powerful Inium Sense sound processing chip. It's our fastest processor ever and it enables Ria2 to process a huge range of different sounds, sending more **high quality** information to your brain. This enables you to understand conversations better, even in noisy environments.

REDUCED LISTENING EFFORT

The main thing that makes life with hearing loss tiring is the sheer effort of listening. Your brain receives fewer and weaker sound signals. Therefore you have to concentrate much harder to understand.

Creating a complete sound picture

The wide range of sound details that Ria2 can process ensures a more comfortable and focused listening experience with fewer distractions.

Easy listening, throughout the day

The ability to process a huge range of sounds means that your brain is supplied with a better sound picture. This makes listening easier throughout the day.

Do you experience tinnitus? Ria2 can help.

Many people with hearing loss experience tinnitus as a ringing in their head. You might also experience tinnitus as a buzzing, humming or whistling sound or even the sound of crickets chirping, as tinnitus can take many forms. Even though there is no known cure, tinnitus doesn't have to interfere with your enjoyment of life. Your Ria2 hearing device can be programmed to create customized relief sounds that may minimize the irritating effect your tinnitus sounds have on you. Ask your hearing care professional about Ria2's Tinnitus SoundSupport™ capabilities*.

*Not available on all Ria2 models.

ENJOY THE **PERFECT FIT** FOR **YOUR EARS** AND YOUR WORLD

Hearing is an extremely personal experience. No one else hears the same way you do.

The way your brain interprets sound depends on many complex personal preferences. Our personal hearing preferences can be affected by our mood, level of tiredness and many other factors. This is what makes the ability to personalize your hearing devices such a huge advantage.

Putting you in control

Oticon Ria2 allows your hearing care professional to personalize your hearing experience based on your individual sound preferences.

CHOOSING THE **LOOK** THAT'S **RIGHT FOR YOU**

Oticon Ria2 devices are designed to not only match your hearing preferences but are also customized to match your personal style. Choose from many different models that suit your lifestyle and hearing abilities. They're available in many colors to blend in with your skin or hair.

Ria2 designRITE is available in 13 colors.

Ria2 miniRITE is available in 8 colors.

Ria2 is also available in other custom styles.

THE EASY WAY TO STAY **CONNECTED**

There's no feeling quite like being fully involved in the world around you, and Ria2 – used together with ConnectLine – allows you to connect easily and wirelessly.

ConnectLine's Streamer Pro streams sound from devices such as your telephone or TV to your Ria2 hearing instruments, all in one integrated system. With ConnectLine you can stay closely connected with loved ones on a landline phone*; cell phone or with video chat. You can even watch TV* and listen to music in the company of others at a volume that is comfortable for everyone.

Easy to set up and simple to use, Ria2 and ConnectLine can be tailored specifically to your needs and preferences, so that operation is intuitive.

* Requires additional
ConnectLine accessories
