## Enjoy the sound of life.

The new Aquaris™. Hearing at its best.  
Lets sound in, keeps the elements out.

Life sounds brilliant.

## Enjoy being immersed in sound.

It doesn't matter what you do in life, you want to enjoy every moment of it. Now you can always wear your hearing instruments, no matter how active your lifestyle. Virtually shock-resistant and completely sealed to keep dust and water out, Aquaris delivers outstanding sound quality no matter where you are. Whatever your surroundings, with Aquaris you'll always be in your element.

## Enjoy total freedom

Setting new standards with its unique design, Aquaris is the most robust\*, truly waterproof hearing instrument available. Its soft-touch lacquering and ergonomic shape make it virtually shockproof and ensures that it sits snugly on your ear, preventing it from slipping off.

Resistant to dust, perspiration and humidity, it's perfect for people who spend time in demanding conditions. Wherever you are, whether it's working in the garden, sweating at the gym, or building sandcastles on the beach, Aquaris keeps the elements of daily life out, even when showering or swimming.

Designed to deliver outstanding sound quality, the smart technology in Aquaris optimizes hearing performance with exceptional clarity and sound comfort so you can enjoy life without limits.

\*Achieved IP68 rating per IEC 60529 standard. The device can be completely submerged with no water seeping inside, and no damage to the instrument during continuous immersion in water up to 3 feet. Also dust will not interfere with the satisfactory operation of the device. Requires appropriate earmold for submersion.

## Tinnitus control feature

The ideal option for people who want to control tinnitus, Aquaris helps manage the condition at the same time as improving hearing. By emitting a therapy signal that can be precisely set to suit you, it diverts attention from the annoying effects of tinnitus and makes it easier to focus on external sounds, reducing strain and helping provide a more peaceful state of mind.

## Completely waterproof

Conventional water-resistant instruments can withstand splashes at most. Tested to IP68\*, Aquaris' unique technology is completely dustproof and waterproof making it suitable for continuous immersion in water.

### Waterproof microphone membrane

The microphone membranes are both waterproof and "sound-permeable", enabling the highest sound quality possible.

### Nano-coated receiver protection

A nano-coated grill in the screw cap stops water from entering.

### Cover clip

Welded onto the housing using an ultrasonic process, it protects the microphone membranes and helps reduce wind noise.

### Bottle housing (no openings)

Produced as one complete piece and connected to the battery compartment using a silicone sealant.

### Waterproof membrane for air exchange

Prevents the entrance of water but permits oxygen, allowing Aquaris to function optimally with standard zinc air batteries.

### Sealed battery door

Ensures that no water gets inside the instrument or damages the batteries.

Aquaris is available in a choice of five nature-themed colors.

## Accessories

### Sport Clip

The optional Sport Clip affixes Aquaris securely to prevent the displacement or loss of your instruments while you're engaged in activities requiring lots of movement.

Aquaris with Sport Clip

### Aquapac

Aquapac is the ideal place to store remote controls, mobile phones, and MP3 players when you're at the pool or in the garden. With up to 3 feet of (1 m) water pressure resistance, it ensures your devices are well protected.

aquapac

## A constant stream of enjoyment

Siemens miniTek® and Tek offer® state-of-the-art wireless connectivity to a variety of Bluetooth® technology-enabled devices like cell phones, MP3 players, your computer, TV, and more. Hear your electronic devices directly through your hearing aids in true stereo, at your preferred volume, without disturbing others.

VoiceLink™, a combination Bluetooth® transmitter and separate microphone, streams a companion's voice directly to miniTek. The wearer can hear speech as if they were standing only inches apart which is especially useful for noisy environments like restaurants, meeting rooms, or large gatherings.

Siemens miniTek was named Bluetooth® SIG Best of CES Next Category Award Winner and Bluetooth® SIG Best of CES Fan Favorite Award Winner.

## Enjoy life's true sound

To give you the most natural hearing possible, Aquaris is equipped with the newest version of BestSound™ Technology, a complete revolution in audiological engineering that delivers comfortable, clear, and natural sound quality. You're likely to forget you're wearing hearing aids.

For many people wearing a hearing instrument for the first time, some sounds can seem too loud or harsh. BestSound Technology's enhanced functionality tailors the sound experience to the way you want to hear, by adjusting the sound to a level that feels natural for you so that you can enjoy hearing effortlessly. Great for experienced users and first-time wearers alike, Aquaris learns and adjusts automatically, memorizing how you like to hear in different environments, and adjusts when it detects those situations again. And with its directional microphone, you'll hear what's important, comfortably and clearly, no matter where sound is coming from.

The more experienced you become, the more Aquaris grows with you, offering additional functions such as more power, user-definable settings, and directionality. So wherever you are, whether it's a noisy pool, a secluded beach, or even a restaurant, you can enjoy the sound of life to the fullest.
